Dear Holland Shepherd:

RE: Cub Mine ventilation shaft reclamation M/037/044

The Cub Mine site has been reclaimed as per the Plan of Operation. The reclamation of the site included removal of all buildings, pads, foreign material, the covering of the portal, recontouring the waste dump, backcovering the site with topsoil and reseeding. The ventilation shaft has been reclaimed as per the amended procedure submitted by Kelmine Corp. on Sept. 26, 1992 and approved by DOGM on November 4, 1992. The stipulation made in the November approval that vehicles be prevented from accessing the actual shaft collar has been accomplished by placing large boulders on top of and around the covered shaft. This area has been recontoured and reseeded. The roadway to the shaft has been left open, but was reseeded.

If there are any questions feel free to contact myself or the contractor; Boulden Contracting Co., 2415 South Highway 191, Moab, Utah 84532 or 801-259-8926.

Sincerely yours,

Melvin R. Swanson
